What the farmer needs now, says the De Kalb, Mo. Herald, is a noiseless tractor so he can have a radio attached. With that improvement and a place under the seat for the ice cream freezer, the Herald can think of nothing more a farmer would ever need.

THEY OVERLOOKED THE DIAMONDS

There is a modern fallacy to the effect that "What you don't know won't hurt you." It is also a fallacy. For instance: The farmers of the Kimberly region were disgusted and disheartened. They said the soil was too rocky for them to make a living. Some left and others died in poverty. —And all the time their children were playing with diamonds. But the farmers didn't know. They thought the diamonds were pebbles.

Don't be like the Kimberly farmers.

Don't seek opportunity in some distant place and overlook the diamonds that are daily within your grasp. Advertising is a mine of opportunity. It tells you of values you wouldn't know about if it were not there to guide you. The secret of economical buying is information. The man or woman who is best informed is the one who buys to the best advantage.

Read the advertisements. Know!
