The annual meeting of the members of the Femme Osage Saturday afternoon. The following officers were re-elected: Theo. Mallinkrodt Jr., president; Hy. Webnik, secretary; Herman Backhaus, treasurer. The contract for delivering poles to the company's line near Dutzow where repair work is to be done was given to Edwin Hennecke. A survey and inspection of the telephone line will be made in

the near future. The weather forecast given out by the Femme Osage weather bureau in regard to the moderate temperature and a little cold here and there struck a cog. When old man groundhog poked his head out of his burrow on Feb. 2 and got an eyeful of his shadow, then retreated to his winter quarters and curled himself up for another nap feeling satisfied that another six weeks of winter weather is in the offing. A day or two later the prevailing south-west wind shifted to the north and sent a howling blizzard and sub-zero weather down over the central states. Now folks, get this straight, we are not making any predictions in regard to the six weeks of winter mentioned above as we are not connected with a weather station, and furthermore, we do not believe in any kind of a prediction and consider same as a lot of hokey 'Viele sind die propheten, die brot essen.'

PINEAPPLE TAKES NEW ROLE

Canned pineapple, familiar food delicacy on the American table for so many years, is seen today in a new role. New food research has found that canned pineapple is a valuable source of the necessary minerals and vitamins A, B, and C. Authorities recommend two slices or an equivalent amount in crushed pineapple or tidbits in the daily menu as an aid in maintaining health. In addition to its mineral and vitamin content pineapple has been found to be a valuable aid to digestion of proteins such as meat and eggs and to the prevention and relief of acidosis. A beneficial diuretic change wrought by temperature during the canning process is said to make these tidbits true of the canned rather than the raw fruit. Smart business following the new dietetic advice, are serving the new pineapple cups made from the canned crushed fruit or tidbits as the first course for dinner or two slices for the breakfast fruit, luncheon salad or for the dinner dessert. And their guests proclaim it delicious.

To Make Good Pies

It's a gift, some say. It's luck, say others. It's a good recipe—and a little care, say we. People differ as to what constitutes a good soup, a good salad or a good sweet, but they seem to pretty generally agree that good pies should have tender, flaky crust that stays crisp, and an interior which melts to your mouth. The Why of Pie Thickness of crust is the result of alternate layers of flour and fat and depends on the amount of cutting one does when mixing the fat into the flour. To make the crust tender, only enough water should be used — too water is preferable — to hold the shortening and flour together. You will be pleased with this recipe for Apple Sauce Pie: To make the pastry, put two cups poultry flour and one-half teaspoon salt through a flour sifter into a bowl. Add one egg yolk, chopping it into the flour with a sharp knife. Then add ice-water—just enough to hold the flour and hard to gather—very slowly, mixing all the time lightly with your hand. Roll the pie into a lump. Cover with flour and place in refrigerator over night. The next day roll out and bake immediately in a hot oven. For the filling, mix the contents of a No. 2 can of apple sauce, two tablespoons melted butter, one teaspoon lemon juice and one-fourth teaspoon allspice. Fill the sweetly baked crusty with this mixture. Suitable cheese over the top and serve.
